Quiero guardar los elementos de una ArrayList en un ArrayList de la siguiente manera: public static ArrayList nombres = new ArrayList(); Y que luego pueda utilizar los elementos de ese ArrayList en otros métodos. Por ejemplo, en una función encargada de comparar las palabras del usuario con los elementos de la ArrayList nombres. A: Una opción es, obtener la posición de un elemento de ArrayList utilizando get(), por ejemplo: public static void main(String[] args) { ArrayList nombres = new ArrayList(); nombres.add("MiElemento"); nombres.add("TuElemento"); nombres.add("HisElemento"); nombres.add("YTremElemento"); System.out.println("Posicion 'MiElemento': " + nombres.get(0)); System.out.println("Posicion 'TuElemento': " + nombres.get(1)); System.out.println("Posicion 'HisElemento': " + nombres.get(2)); System.out.println("Posicion 'YTremElemento': " + nombres.get(3)); } Como ves, uso el get(), es como si fuera un índice 0,1,2,3 en el ArrayList, donde 0 sería el primer elemento, 1, el seg
